PROFESSIONAL PROFILE

Product and UX Designer with over six years of experience across user experience, interface design and visual design. Also designs and builds AI-powered customer systems — chatbots, AI voice agents, CRM integrations and workflow automation — backed by a Certified AI Consultant qualification. Experienced in running the full design process — user research, information architecture, wireframing, prototyping and usability testing — and translating findings into interfaces that stay clear, accessible and consistent at scale. Proficient in Figma, Adobe XD, Illustrator and Photoshop, with a strong command of design systems, responsive layout, typography and visual hierarchy, and hands-on experience taking designs through to working web builds. Experienced in collaborating with stakeholders, product managers and development teams to turn business requirements into products people can actually use. Brings a combination of end-to-end UX practice and professional visual design craft, with a record of measurable improvements in user engagement, conversion and satisfaction.

TECHNOLOGY & TOOLS

Figma
Adobe Illustrator
Adobe Photoshop
Adobe InDesign
Adobe XD
Zeplin
Maze & Figjam
Canva & Miro

PROFESSIONAL SKILLS

User Research & Usability Testing
Wireframing & Prototyping
Information Architecture & User Flows
UI Design & Responsive Web Design
Design Systems & Component Libraries
Interaction & Visual Design
AI Chatbot & Voice Agent Design
Layout, Typography & Visual Hierarchy
Accessibility & WCAG Compliance
Stakeholder Collaboration
Brand Identity & Visual Communication
Web Design, SEO & CMS
CRM & Workflow Automation

EMPLOYMENT HISTORY

Web & AI Product Designer | *NEXA Studio* | May 2026 – Present

A design-led digital studio in Adelaide that designs and builds websites, AI receptionists and CRM follow-up for small businesses, delivered as one connected system.

- Design client websites, landing pages and digital products end to end, from discovery and user journeys through to high-fidelity design, build and launch.
- Work through a four-stage process (discover, design in Figma, build, launch), mapping business goals, audiences and page structure before any screen is designed, and reviewing designs with clients throughout.
- Design responsive, accessible websites with SEO, performance and an editable CMS built in from the start, and take them through to production builds and launch.
- Design AI customer systems, including chatbots trained on a client's own documents, AI voice receptionists, automated booking and CRM follow-up, defining conversation flows, tone and the point where the assistant hands over to a person.
- Designed Arkan, a website and AI assistant for a business strategy advisory, with a site structured around the firm's method, a qualifying enquiry form and accessibility handled during the build rather than retrofitted.

Product & UX Designer | RunX | January – March 2026

A running app and responsive marketing site for beginner and returning runners, built around the point in a training plan where new runners drop off.

- Delivered the project end to end as the sole designer, from user research and competitive analysis through to information architecture, UI design, a hi-fi prototype and usability testing.

- Conducted user interviews, surveys and competitive benchmarking, translating findings into personas, journey maps and prioritisation decisions that shaped the product scope.
- Structured the information architecture and user flows, then designed the interface and the component system that carried it across every screen.
- Designed the plan-recovery flow that adapts a training plan after missed sessions rather than resetting it — the moment where most running apps lose new runners.

Graphic & Brand Designer (Volunteer) | Persian Cultural Association of South Australia (PCASA) | March 2026 – Present

A not-for-profit community association promoting Persian culture in South Australia through cultural events, festivals and community programs.

- Produce graphic design and marketing collateral for cultural events and festivals, including event posters, banners, signage, flyers, brochures and presentation decks across print and digital.
- Apply and maintain the association's brand identity across all materials, keeping logo use, typography, colour and layout consistent from one campaign to the next.
- Design social media and digital content for event campaigns, adapting artwork to multiple formats and platforms to extend reach and support attendance.
- Work to brief with committee members and event organisers, delivering print-ready and digital final artwork to deadline for each event.
- Design bilingual English and Persian materials, handling right-to-left typography and layout alongside English within a single visual system.

Professional Development & Design Practice | December 2023 – 2025

- Relocated to Australia and maintained an active design practice through self-directed projects while continuing formal professional development, completing seven UX, usability and design thinking certifications with the Interaction Design Foundation and staying engaged with the design field.

UI/UX Designer | *PartoBita* | January 2021 – November 2023

A knowledge-based software company specialising in web applications and professional software for finance, industry and information management, including projects for Iran's government, Financial Total System and Poultry Industry System.

- Led end-to-end design process, from conceptualisation to implementation, focusing on user needs and UX/UI principles.
- Conducted user research and market analysis to stay updated with industry trends and inform and refine design decisions.
- Developed wireframes and interactive prototypes and created responsive designs for various devices and screen sizes.
- Iterated on designs based on user feedback and usability testing to achieve design consistency, readability and alignment with brand identity.
- Designed intuitive interactions, animations and transitions to enhance user engagement and overall experience whilst working closely with stakeholders and the Product Manager.

Key Achievements:

- Improved the user interface and experience of national systems such as Iranegg, Henwork and Samatim over three years, leading to a 40% increase in user engagement and satisfaction by tailoring designs to various user preferences.

UI / Visual Designer | Chakav | August 2019 – December 2020

A streamlined online platform for ordering a diverse selection of breakfast items.

- Designed high-fidelity mock-ups, graphics and visual assets for applications and marketing materials, applying principles of design such as alignment, hierarchy and spacing for aesthetically pleasing compositions.
- Maintained a cohesive visual style across design elements and platforms, creating prototypes to visualise design concepts.
- Created and implemented design systems and style guides to align teams in achieving consistent design processes.
- Collaborated with UX designers to improve the overall user experience whilst considering usability and accessibility.

Key Achievements:

- Achieved a 20% increase in sales by designing a user-friendly application for the takeaway breakfast store, which enhanced customer engagement and order efficiency.

Web & Visual Designer | *Technolife* | March – July 2019

Recognised as the largest specialised store for mobile phones and digital goods, importing and supplying mobile phone brands through a professional online store since 2013.

- Worked towards data-informed design decisions and optimised user experience through in-depth user research, usability testing and design solutions implementation in collaboration with development teams and stakeholders.
- Designed and implemented high-quality visual assets to enhance the functionality and aesthetics of user interfaces.
- Maintained consistent user experience across different devices and screen sizes through accessible, responsive design.

Key Achievements:

- Improved user experience by leading the comprehensive redesign of the Technolife website and streamlining navigation.
- Reduced click-through steps by 50% and optimised load times, resulting in a 30% increase in conversion rates and a 15% boost in organic traffic.

Visual Designer | *Digikala* | September 2017 – September 2018

One of Iran's largest online retailers, offering a diverse range of products from home appliances to clothing and cosmetics, renowned for its authentic items, secure payment system and 24-hour customer service.

- Designed product pages and promotional materials for the e-commerce platform, ensuring visual appeal and alignment with branding guidelines.
- Maintained consistent branding and user experience across cross-functional teams to deliver cohesive design solutions.
- Translated client requirements and user needs into engaging and effective design solutions whilst monitoring industry trends and designing best practices to continuously enhance design quality and innovation.
- Provided guidance and support to junior team members to foster their development and maintain high design standards.

Key Achievements:

- Played a key role in increasing user satisfaction by 40% by designing impactful product pages and promotional materials in line with client and user needs and branding identity.
